

Application No. 10/089,760
Attorney Docket No. PG3786USW

In the Claims:

1. (Cancelled)

2. (Cancelled)

3. (Currently amended) ~~A portable device according to Claim 1,~~ A portable device for the delivery of medicament comprising

a housing;

received by said housing, a medicament container;

associated with said medicament container, a dispensing mechanism for dispensing medicament from the medicament container;

said portable device further comprising an electronic data management system comprising

a memory for storage of data concerning use of said portable device;

a microprocessor for performing operations on said data; and

a transmitter for transmitting a signal relating to the data or the outcome of an operation on the data; and

associated with the electronic data management system, a communicator for wireless communication with a remote network computer system to enable two-way transfer of data between the network computer system and the electronic data management system

wherein the data is communicable between the network computer system and the electronic data management system in encrypted form.

Application No. 10/089,760
Attorney Docket No. PG3786USW

4. (Cancelled)

5. (Cancelled)

6. (Currently amended) ~~A portable device according to Claim 1, A portable device for the delivery of medicament comprising~~

a housing;

received by said housing, a medicament container;

associated with said medicament container, a dispensing mechanism for dispensing medicament from the medicament container;

said portable device further comprising an electronic data management system comprising

a memory for storage of data concerning use of said portable device;

a microprocessor for performing operations on said data; and

a transmitter for transmitting a signal relating to the data or the outcome of an operation on the data; and

associated with the electronic data management system, a communicator for wireless communication with a remote network computer system to enable two-way transfer of data between the network computer system and the electronic data management system

wherein the communicator includes an embedded network server.

7. (Currently amended) ~~A portable device according to Claim 1, A portable device for the delivery of medicament comprising~~

Application No. 10/089,760
Attorney Docket No. PG3786USW

a housing;

received by said housing, a medicament container;

associated with said medicament container, a dispensing mechanism for dispensing medicament from the medicament container;

said portable device further comprising an electronic data management system comprising

a memory for storage of data concerning use of said portable device;

a microprocessor for performing operations on said data; and

a transmitter for transmitting a signal relating to the data or the outcome of an operation on the data; and

associated with the electronic data management system, a communicator for wireless communication with a remote network computer system to enable two-way transfer of data between the network computer system and the electronic data management system

wherein the communicator communicates with the network computer system via a second communications device having telecommunications capability.

8. (Previously presented) A portable device according to claim 7, wherein the telecommunications device comprises a cellular phone or pager.

9. (Previously presented) A portable device according to Claim 7, wherein the communicator communicates with the second communications device using spread spectrum radiofrequency signals.

10. (Cancelled)

Application No. 10/089,760
Attorney Docket No. PG3786USW

11. (Currently amended) ~~A portable device according to Claim 1,~~ A portable device for the delivery of medicament comprising

a housing;

received by said housing, a medicament container;

associated with said medicament container, a dispensing mechanism for dispensing medicament from the medicament container;

said portable device further comprising an electronic data management system comprising

a memory for storage of data concerning use of said portable device;

a microprocessor for performing operations on said data; and

a transmitter for transmitting a signal relating to the data or the outcome of an operation on the data; and

associated with the electronic data management system, a communicator for wireless communication with a remote network computer system to enable two-way transfer of data between the network computer system and the electronic data management system

wherein the network computer system comprises a private access network computer system.

12. (Cancelled)

13. (Currently amended) ~~A portable device according to claim 12,~~ A portable device for the delivery of medicament comprising

a housing;

Application No. 10/089,760
Attorney Docket No. PG3786USW

received by said housing, a medicament container;

associated with said medicament container, a dispensing mechanism for dispensing medicament from the medicament container;

said portable device further comprising an electronic data management system comprising

a memory for storage of data concerning use of said portable device;

a microprocessor for performing operations on said data; and

a transmitter for transmitting a signal relating to the data or the outcome of an operation on the data; and

associated with the electronic data management system, a communicator for wireless communication with a remote network computer system to enable two-way transfer of data between the network computer system and the electronic data management system

wherein the communicator enables communication with a user-specific network address in the network computer system

wherein the user-specific network address is selected from the group consisting of a web-site address, an e-mail address and a file transfer protocol address.

14. (Currently amended) A portable device according Claim 12, A portable device for the delivery of medicament comprising

a housing;

received by said housing, a medicament container;

Application No. 10/089,760
Attorney Docket No. PG3786USW

associated with said medicament container, a dispensing mechanism for dispensing medicament from the medicament container;

said portable device further comprising an electronic data management system comprising

a memory for storage of data concerning use of said portable device;

a microprocessor for performing operations on said data; and

a transmitter for transmitting a signal relating to the data or the outcome of an operation on the data; and

associated with the electronic data management system, a communicator for wireless communication with a remote network computer system to enable two-way transfer of data between the network computer system and the electronic data management system

wherein the communicator enables communication with a user-specific network address in the network computer system

wherein the user-specific network address is accessible to a remote information source such that information from said remote information source can be made available to said user-specific network address.

15. (Previously presented) A portable device according to claim 14, wherein information from the user-specific network address can be made available to the remote information source.

16. (Previously presented) A portable device according to Claim 14, wherein the remote information source is a medicament prescriber.

17. (Previously presented) A portable device according to Claim 14, wherein the remote information source is a pharmacy.

Application No. 10/089,760
Attorney Docket No. PG3786USW

18. (Previously presented) A portable device according to Claim 14, wherein the remote information source is an emergency assistance provider.

19. (Previously presented) A portable device according to Claim 14, wherein the remote information source is a manufacturer of medicament or medicament delivery systems.

20. (Previously presented) A portable device according to Claim 14, wherein the remote information source is a research establishment.

21. (Previously presented) A portable device according to claim 14, wherein the remote information source is an environmental monitoring station.

22. (Currently amended) ~~A portable device according to Claim 1,~~ A portable device for the delivery of medicament comprising

a housing;

received by said housing, a medicament container;

associated with said medicament container, a dispensing mechanism for dispensing medicament from the medicament container;

said portable device further comprising an electronic data management system comprising

a memory for storage of data concerning use of said portable device;

a microprocessor for performing operations on said data; and

a transmitter for transmitting a signal relating to the data or the outcome of an operation on the data; and

Application No. 10/089,760
Attorney Docket No. PG3786USW

associated with the electronic data management system, a communicator for wireless communication with a remote network computer system to enable two-way transfer of data between the network computer system and the electronic data management system

additionally comprising a datalink for linking to a local data store to enable communication of data between the local data store and the microprocessor.

23. (Previously presented) A portable device according to claim 22, wherein the datalink comprises an infrared emitter and sensor.

24. (Previously presented) A portable device according to Claim 22, wherein the local data store comprises a personal computer or set-top box.

25. (Currently amended) ~~A portable device according to Claim 1,~~ A portable device for the delivery of medicament comprising

a housing;

received by said housing, a medicament container;

associated with said medicament container, a dispensing mechanism for dispensing medicament from the medicament container;

said portable device further comprising an electronic data management system comprising

a memory for storage of data concerning use of said portable device;

a microprocessor for performing operations on said data; and

a transmitter for transmitting a signal relating to the data or the outcome of an operation on the data; and

Application No. 10/089,760
Attorney Docket No. PG3786USW

associated with the electronic data management system, a communicator for wireless communication with a remote network computer system to enable two-way transfer of data between the network computer system and the electronic data management system

additionally comprising a data input system for user input of data to the electronic data management system.

26. (Previously presented) A portable device according to claim 25, wherein said data input system comprises a man machine interface selected from the group consisting of a keypad, voice recognition interface, graphical user interface (GUI) or biometrics interface.

27. (Cancelled)

28. (Currently amended) ~~A portable device according to Claim 1, A portable device for the delivery of medicament comprising~~

a housing;

received by said housing, a medicament container;

associated with said medicament container, a dispensing mechanism for dispensing medicament from the medicament container;

said portable device further comprising an electronic data management system comprising

a memory for storage of data concerning use of said portable device;

a microprocessor for performing operations on said data; and

a transmitter for transmitting a signal relating to the data or the outcome of an operation on the data; and

Application No. 10/089,760
Attorney Docket No. PG3786USW

associated with the electronic data management system, a communicator for wireless communication with a remote network computer system to enable two-way transfer of data between the network computer system and the electronic data management system

wherein said electronic data management system includes a predictive algorithm or look-up table for calculating the optimum amount of medicament to dispense.

29. (Previously presented) A portable device according to claim 28, wherein the memory includes a dose memory for storing dosage data and reference is made to the dose memory in calculating the optimum amount of medicament to dispense.

30 – 32 (Cancelled)

33. (Cancelled)

34. (Currently amended) ~~A portable device according to Claim 1, A portable device for the delivery of medicament comprising~~

a housing;

received by said housing, a medicament container;

associated with said medicament container, a dispensing mechanism for dispensing medicament from the medicament container;

said portable device further comprising an electronic data management system comprising

a memory for storage of data concerning use of said portable device;

a microprocessor for performing operations on said data; and

Application No. 10/089,760
Attorney Docket No. PG3786USW

a transmitter for transmitting a signal relating to the data or the outcome of an operation on the data; and

associated with the electronic data management system, a communicator for wireless communication with a remote network computer system to enable two-way transfer of data between the network computer system and the electronic data management system

additionally comprising a geographic positioning system.

35. (Cancelled)

36. (Currently amended) ~~A portable device according to claim 35, A portable device for the delivery of medicament comprising~~

a housing;

received by said housing, a medicament container;

associated with said medicament container, a dispensing mechanism for dispensing medicament from the medicament container;

said portable device further comprising an electronic data management system comprising

a memory for storage of data concerning use of said portable device;

a microprocessor for performing operations on said data; and

a transmitter for transmitting a signal relating to the data or the outcome of an operation on the data; and

associated with the electronic data management system, a communicator for wireless communication with a remote network computer system to enable two-way transfer of

Application No. 10/089,760
Attorney Docket No. PG3786USW

data between the network computer system and the electronic data management system

additionally comprising a sensor which senses the breath of a user, wherein the sensor communicates breath data to the electronic data management system, wherein said sensor comprises a breath-movable element which is movable in response to the breath of a patient.

37. (Previously presented) A portable device according to claim 36, wherein said breath-movable element is selected from the group consisting of a vane, a sail, a piston and an impeller.

38. (Currently amended) ~~A portable device according to claim 35, A portable device for the delivery of medicament comprising~~

a housing;

received by said housing, a medicament container;

associated with said medicament container, a dispensing mechanism for dispensing medicament from the medicament container;

said portable device further comprising an electronic data management system comprising

a memory for storage of data concerning use of said portable device;

a microprocessor for performing operations on said data; and

a transmitter for transmitting a signal relating to the data or the outcome of an operation on the data; and

associated with the electronic data management system, a communicator for wireless communication with a remote network computer system to enable two-way transfer of

Application No. 10/089,760
Attorney Docket No. PG3786USW

data between the network computer system and the electronic data management system

additionally comprising a sensor which senses the breath of a user, wherein the sensor communicates breath data to the electronic data management system, wherein the sensor comprises a pressure sensor for sensing the pressure profile associated with the breath of a user.

39. (Cancelled)

40. (Cancelled)

41. (Currently amended) A portable device according to claim 35, A portable device for the delivery of medicament comprising

a housing;

received by said housing, a medicament container;

associated with said medicament container, a dispensing mechanism for dispensing medicament from the medicament container;

said portable device further comprising an electronic data management system comprising

a memory for storage of data concerning use of said portable device;

a microprocessor for performing operations on said data; and

a transmitter for transmitting a signal relating to the data or the outcome of an operation on the data; and

associated with the electronic data management system, a communicator for wireless communication with a remote network computer system to enable two-way transfer of

Application No. 10/089,760
Attorney Docket No. PG3786USW

data between the network computer system and the electronic data management system

additionally comprising a sensor which senses the breath of a user, wherein the sensor communicates breath data to the electronic data management system, wherein the sensor comprises a moisture sensor for sensing the moisture profile associated with the breath of a user.

42. (Currently amended) ~~A portable device according to claim 35; A portable device for the delivery of medicament comprising~~

a housing;

received by said housing, a medicament container;

associated with said medicament container, a dispensing mechanism for dispensing medicament from the medicament container;

said portable device further comprising an electronic data management system comprising

a memory for storage of data concerning use of said portable device;

a microprocessor for performing operations on said data; and

a transmitter for transmitting a signal relating to the data or the outcome of an operation on the data; and

associated with the electronic data management system, a communicator for wireless communication with a remote network computer system to enable two-way transfer of data between the network computer system and the electronic data management system

Application No. 10/089,760
Attorney Docket No. PG3786USW

additionally comprising a sensor which senses the breath of a user, wherein the sensor communicates breath data to the electronic data management system, wherein the sensor comprises a gas sensor for sensing the oxygen or carbon dioxide profile associated with the breath of a user.

43. (Currently amended) ~~A portable device according to Claim 35,~~ A portable device for the delivery of medicament comprising

a housing;

received by said housing, a medicament container;

associated with said medicament container, a dispensing mechanism for dispensing medicament from the medicament container;

said portable device further comprising an electronic data management system comprising

a memory for storage of data concerning use of said portable device;

a microprocessor for performing operations on said data; and

a transmitter for transmitting a signal relating to the data or the outcome of an operation on the data; and

associated with the electronic data management system, a communicator for wireless communication with a remote network computer system to enable two-way transfer of data between the network computer system and the electronic data management system

additionally comprising a sensor which senses the breath of a user, wherein the sensor communicates breath data to the electronic data management system, wherein said breath data includes breath cycle data.

Application No. 10/089,760
Attorney Docket No. PG3786USW

44. (Currently amended) ~~A portable device according to Claim 35, A portable device~~
for the delivery of medicament comprising

a housing;

received by said housing, a medicament container;

associated with said medicament container, a dispensing mechanism for dispensing
medicament from the medicament container;

said portable device further comprising an electronic data management system
comprising

a memory for storage of data concerning use of said portable device;

a microprocessor for performing operations on said data; and

a transmitter for transmitting a signal relating to the data or the outcome of an
operation on the data; and

associated with the electronic data management system, a communicator for wireless
communication with a remote network computer system to enable two-way transfer of
data between the network computer system and the electronic data management
system

additionally comprising a sensor which senses the breath of a user, wherein the sensor
communicates breath data to the electronic data management system, wherein said
breath data includes peak flow data.

45. (Currently amended) ~~A portable device according to Claim 35, A portable device~~
for the delivery of medicament comprising

a housing;

Application No. 10/089,760
Attorney Docket No. PG3786USW

received by said housing, a medicament container;

associated with said medicament container, a dispensing mechanism for dispensing medicament from the medicament container;

said portable device further comprising an electronic data management system comprising

a memory for storage of data concerning use of said portable device;

a microprocessor for performing operations on said data; and

a transmitter for transmitting a signal relating to the data or the outcome of an operation on the data; and

associated with the electronic data management system, a communicator for wireless communication with a remote network computer system to enable two-way transfer of data between the network computer system and the electronic data management system

additionally comprising a sensor which senses the breath of a user, wherein the sensor communicates breath data to the electronic data management system.

additionally comprising an actuator for actuating the dispensing mechanism, said actuator being actuatable in response to a trigger signal from the transmitter.

46. (Previously presented) A portable device according to claim 45, wherein the electronic data management system includes a predictive algorithm or look-up table for deriving from the breath data when to transmit the trigger signal.

47. (Cancelled)

48. (Cancelled)

Application No. 10/089,760
Attorney Docket No. PG3786USW

49. (Previously presented) A portable device according to Claim 45, wherein said actuator comprises an energy store for storing energy which energy is releasable to actuate the dispensing mechanism of the medicament container.

50-51. (Cancelled).
